

100,000 charging points by 2020

- **Charge4Europe launches operations**
- **Partnership agreement signed with Hsubject**

Dortmund, 8 August 2019.

The joint venture Charge4Europe between Euro Service GmbH + Co. KG and innogy SE successfully launched its operations. Charge4Europe's mission is to develop a European, brand-independent charging network and make this available to its shareholders and their customers.

In July, Charge4Europe signed a licence agreement with Hsubject, one of the largest international e-roaming platform operators, building on DKV and innogy's successful business ties with Hsubject.

"This agreement allows us to speed up the development of one of the largest brand-independent charging networks to help us reach our ambitious targets," says Suthalan Ganes, Supplier Management eMobility DKV Euro Service. Christian Hahn, CEO of Hsubject added: "I look forward to welcoming Charge4Europe, our new ambitious partner in electric mobility, who will help set up an open and common marketplace for electric mobility using new and innovative strategies."

About innogy SE

innogy SE is a leading German energy company, with revenue of around €37 billion (2018) and around 43,000 employees. With its three business segments Renewables, Grid & Infrastructure and Retail, innogy addresses the requirements of a modern, decarbonised, decentralised and digital energy world. Its activities focus on its about 22 million customers, and on offering them innovative and sustainable products and services which enable them to use energy more efficiently and improve their quality of life. The key markets are Germany, the United Kingdom, the Netherlands and Belgium, as well as several countries in Central Eastern and South Eastern Europe, especially the Czech Republic, Hungary and Poland. In renewable power generation, the company is also active in other regions, e.g. Spain, Italy and the USA, with a total capacity of 4.0 gigawatts. As a leader of innovation in future-oriented fields like eMobility, we are represented in the international hot-spots of the technology industry such as Silicon Valley, Tel Aviv and Berlin. We combine the extensive expertise of our energy technicians and engineers with digital technology partners, from start-ups to major corporates.

About Hsubject

Hsubject simplifies the charging of electric vehicles. Through its e-roaming network, the specialist in electric mobility connects charging point operators and traction current suppliers within its interchange network, facilitating uniform access to charging infrastructure. With more than 100,000 charging points and over 300 B2B partners in 26 countries, interchange is the largest independent charging network for the world's electric cars. Hsubject also advises car manufacturers, charging point operators and other companies in the electric vehicle sector that intend to provide electric mobility services or set up Plug&Charge with ISO 15118. In doing so, Hsubject facilitates the breakthrough of electric mobility around the world. Founded in 2012, Hsubject GmbH is a joint venture between the BMW Group, Bosch, Daimler, EnBW, innogy, Siemens and the Volkswagen Group. Hsubject is headquartered in Berlin and has offices in San Francisco, Los Angeles and Shanghai. For more information about Hsubject, please visit hsubject.com.
